

# Who we are

Capmation is an IT consulting and development firm that helps our partners modernize, automate, and maximize their business and IT investments.

## Key differentiators

### Better teams

Our near-shore model gives our clients access to multi-disciplined, highly interactive technical resources—without navigating language barriers or time zone issues.

### Better approach

Our flexible approach is designed around our clients' business goals. We right-size our teams and processes according to their timelines, budgets and objectives. Our Agile model ensures we're building the right solutions to meet their business needs and the scope of their project.

### Better results

Our scalable teams and tried-and-true approach deliver innovative, high-quality end products that require less maintenance, increase ROI, and propel businesses forward.

- Technology
- Health and Wellness
- Financial Services
- Energy
- Government/Public Safety
- Medical Device
- Agriculture

## Locations

U.S., Ecuador, and the South Pacific.

## History

Since 2003, we've partnered with high-growth companies across all industries, from strategic startups to Fortune 500s. What began as a small consulting and development team in the Minneapolis metro has expanded into a global network of DevOps engineers, architects, project managers, business analysts, developers, and testers. Our technology expertise has evolved to include the latest breakthroughs in AI/machine learning, IoT, data analytics, and more. With our core team in Ecuador and support teams in Fiji and Ethiopia, our near-shore model gives our clients the best of all worlds.
